シャンプー

Shampoos

| Shampoo | I want my shampoo to |
|-----------------------|-----------------------|
| Neutral Shampoo | Maintain |
| Smooth Egg Shampoo | Maintain |
| Extra Gold Shampoo | Regenerate my coating |
| Extreme Gloss Shampoo | Create gloss |

Neutral Shampoo

Technologically advanced rinsing components allow easy and trouble-free washing. Cleaning remains, dirt and other residues will not stick to the surface, even if the shampoo dries while washing. Light mint scent, neutral pH level and rich foam that removes dirt quickly and efficiently make this product a great maintenance tool, even for vehicles coated with waxes or professional coatings.

Product No.
04280

Package
1000 ml

Guidelines for usage and handling can be found in the last section.

Smooth Egg Shampoo

A shampoo best dedicated for maintaining cars with professional coatings, that can also be used as a standalone maintenance product. This shampoo causes water to glide off when the car is being rinsed, leaving less water drops behind, and thanks to that, the whole process is quicker and less troublesome. The shampoo produces best results if used in conjunction with other products from the Smooth Egg series.

Product No.
00512

Package
500 ml

Guidelines for usage and handling can be found in the last section.

Extra Gold Shampoo

Regenerate your professional coating by simply washing your car regularly with Extra Gold Treatment Shampoo! This shampoo creates a smooth, glossy and water-repellant shiny layer that does not weaken the coating effect. Can also be used on non-protected vehicles! A sponge is attached to the bottle. No compounds included, suitable for all color tones.

Product No.
04287

Package
750 ml

Guidelines for usage and handling can be found in the last section.

Extreme Gloss Shampoo

An improved successor of King of Gloss shampoos! It removes all kinds of dirt that you may encounter on the road and prepares the body for further protection with other Soft99 products. The Extreme Gloss Wax added to this shampoo will produce a shiny barrier that will protect the paint from deterioration. A sponge is included in the package. Available in two tone variations to produce best results depending on your car paint colour.

Product No.
04291 & 04292

Package
750 ml

Guidelines for usage and handling can be found in the last section.

Waxes

Each Soft99 wax has a different feature and dedication. You can learn about them on the following pages.

Below, you will find a general outline that should guide you to find the right fit!

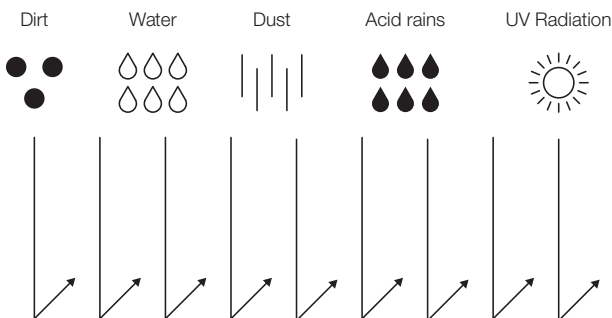

| Wax | Protection | Shine | Quick application |
|-----------------------|-------------------|--------------|--------------------------|
| Fusso Coat | 100% | 80% | 60% |
| Authentic Premium | 60% | 100% | 80% |
| New Soft99 Series | 80% | 80% | 80% |
| Extreme Gloss Wax | 80% | 100% | 80% |
| King of Gloss Wax | 80% | 100% | 80% |
| Mirror Shine Wax | 80% | 100% | 100% |
| Water Block Wax | 100% | 80% | 80% |
| New Scratch Clear Wax | 100% | 80% | 100% |
| Hanneri Wax | 80% | 100% | 80% |
| Hydrogloss Wax | 100% | 80% | 100% |

How does it work?

Fusso Coat 12 Months Wax is based on fluorine polymers that are used for coating teflon pans.

That is the reason why the protective barrier of Fusso Coat is so good at impeding harmful effects that dirt, water, dust, acid rain and UV radiation have on the vehicle.

Fusso Coat PTFE

Car Paint

Wax & Coat

Fusso Coat 12 Months Wax

Fusso Coat 12 Months Wax is a synthetic paint sealant, that creates a protective hydrophobic coat on the car's body. The product is easy to apply, spreads like butter and only a thin layer is required. It leaves a very smooth and glossy finish. What is by far the most important is the durability! Up to 12 months of beading and sheeting is the reason why Fusso Coat is taking the detailing world by storm. Available in two tone variations to produce best results depending on your car paint colour.

Product No.

00298 & 00300

Package

200 g

Guidelines for usage and handling can be found in the last section.

Authentic Premium

A wax work of art. This Japanese masterpiece contains very high amounts of crystal clear carnauba, that will help you to achieve an incredible and natural gloss on your car. There is no risk of unevenness as the product spreads smoothly across surface. Authentic has one of the best finishes amongst all hard waxes! The all golden can comes in an elegant box, with an applicator and a special brush included in the package.

Product No.
10162

Package
200 g

Guidelines for usage and handling can be found in the last section.

New Soft99 Series

New Soft99 are the three basic waxes from Soft99 offer. The products were launched in 1984 and are still, thanks to their great features, continued successfully to this day! They create a long-lasting, hydrophobic protective coat on the vehicle, and bring out the deep shine of your car paint. Available in three tone variations to produce best results depending on your car paint colour.

Product No.

00010 & 00020 & 00027

Package

300g / 350g / 320g

Guidelines for usage and handling can be found in the last section.

Extreme Gloss Wax

The Kiwami, as Extreme Gloss is called in Japanese, is a great product for those who desire perfect balance between glossy finish and protection. Extreme Gloss is very easy to apply and remove, and has a very good finishing. It produces a very strong beading effect, that will amaze you, should there be any water nearby! Make your car paint shiny and as smooth as silk! Available in two tone variations to produce best results depending on your car paint colour.

Product No.

00192 & 00193

Package

200 g

Guidelines for usage and handling can be found in the last section.

King of Gloss Wax

This wax will create a thick, heavy gloss coating of synthetic resin, resembling transparent nail polish. It is very versatile, as it achieves its full potential without any risks of troublesome application. The wax has a very light but noticeable fruity scent. Coming all the way from Japan, the excellent glossy finish and great beading in a large can will surely fulfill all your expectations. Available in two tone variations to produce best results depending on your car paint colour.

Product No.

00175 & 00177

Package

300 g

Guidelines for usage and handling can be found in the last section.

Mirror Shine Wax

Mirror Shine, living up completely to its name, will create a mirror-like, shiny and hydrophobic layer on your car paint. It is a very good alternative for those in constant hurry, as the wax is very easy to apply – you apply it straight onto the paint with the included microfiber cloth, the effects are immediate! Available in two tone variations to produce best results depending on your car paint colour.

Product No.

00373 & 00374

Package

200 g

Guidelines for usage and handling can be found in the last section.

Water Block Wax

Forget about water spots! Water Block is a sheeting wax, that will make water simply slide down your car paint. Blended carnauba and high-adhesive polymers create a great combination of hydrophobicity and natural shine. Combine this wax with products from the Glaco series to create an ultimate raincoat for your car! Available in two tone variations to produce best results depending on your car paint colour.

Product No.

00428 & 00429

Package

200 g

Guidelines for usage and handling can be found in the last section.

New Scratch Clear Wax

Car paint wears off like all things do. Sometimes, it needs to be patched up. New Scratch Clear is a wax formulated with newly developed micro particles. It will fix minor scratches in the blink of an eye, while simultaneously creating a fresh wet look on the paint surface. The wax is very easy to apply – you apply it straight onto the paint with the included microfiber cloth, and the effects are immediate! Available in two tone variations to produce best results depending on your car paint colour.

Product No.

00419 & 00420

Package

200 g

Guidelines for usage and handling can be found in the last section.

Hanneri Wax

Hanneri is one of the first waxes ever to come out of Soft99 factories. It is a soft pasted wax that can be used on any vehicle, but is a good fit for classic cars or old-timers, that have thick car paints. It can remove light dirt and spots on application, and create a beautiful shine on your beloved vehicle! The wax produces best results on all non-black cars.

Product No.
00112

Package
280 g

Guidelines for usage and handling can be found in the last section.

Hydro Gloss Wax

Even the best professional coatings deteriorate in time. Soft99 presents a new, water-based wax that does not contain petroleum solvents, that are harmful to coated vehicles. Bring your coating back to life with this quality product, that will create a hydrophobic protective layer on your vehicle, and give it a fresh, shiny look again! The wax is very easy to apply - you apply it straight onto the paint with the included microfiber cloth, and the effects are immediate!

Quick detailers

Liquid waxes – quick detailers

- products for quick gloss enhancement and removing light dirt between periodic waxing,
- easy and quick application,
- some products do not require washing beforehand.

Basic characteristics of Soft99 quick detailers (liquid waxes)

| Quick detailer | Effect |
|-----------------------|----------------------|
| Luxury Gloss | Shine |
| Fukupika Spray | Protection |
| Fusso Speed & Barrier | Protection and shine |
| Smooth Egg Liquid | Protection |

new

Luxury Gloss

Luxury Gloss is a quick detailer that will restore your car's incredible gloss in the blink of an eye! Make your car paint come alive with a fresh wet-look, achieve slipperiness and hydrophobicity lasting for weeks! All this comes in standard with a very pleasant mango scent. The spray can be used as a standalone wax, or as an enhancer for vehicles already protected with wax coatings.

Product No.
10163

Package
500 ml

Guidelines for usage and handling can be found in the last section.

Fukupika Spray

Legendary Japanese quick detailer that produces that produces a strong hydrophobic effect on the vehicle. Blended fluorine resin drastically increases durability, and prolongs water-proofing for up to 3 months. Improved gloss components will enable you to achieve a deep shine on your car's body. The spray can be used as a standalone wax, or as an enhancer for vehicles already protected with wax coatings.

Product No.
00494

Package
400 ml

Guidelines for usage and handling can be found in the last section.

Fusso Coat Speed & Barrier

Fusso Coat Speed & Barrier is a very easy to use quick detailer that is based on the same ingredients as the products from the Fusso Coat family. This product will protect your car paint by creating a hydrophobic, colour-tinting layer on the car's body, and remove light dirt while applying. Can also be used as a helping hand if too much wax is applied accidentally. A microfiber cloth is included in the set. The spray can be used as a standalone wax, or as an enhancer for vehicles already protected with wax coatings.

Product No.
00088

Package
400 ml

Guidelines for usage and handling can be found in the last section.

Smooth Egg Liquid

A quick detailer that will produce a smooth, water beading hydrophobic layer on your car paint. This product biggest advantage is that it repairs damaged professional quartz, ceramic or glass coatings, by filling in chipped or flaked areas. Smooth Egg Liquid can be used to regenerate almost all parts of the vehicle, even the interior! The product is a perfect gift idea, as it comes in an elegant box, with Smooth Egg Smooth Cloth for application included.

Product No.
00510

Package
250 ml

Guidelines for usage and handling can be found in the last section.

コーティング

Sealants

| Sealant | Effect |
|-------------------------|--------------------------------------|
| Fusso Coat F7 | Full protection |
| Fusso Coat Mirror Shine | Balance between protection and shine |

Fusso Coat F7

Fusso Coat F7 is a liquid sealant that is based on Fusso fluorine polymers. The product creates a shiny, amazingly hydrophobic coat on the car's body. Included sponges are a major help in application, as by using them, you will be sure that the coating is smooth and even. A perfect alternative for those who live in a hurry but still want to have unparalleled protection of their car paint, as the liquid form means easier and quicker application. The product is durable for up to 7 months on regular maintenance.

Glaco Roll On

A product to secure your car's windows with a protective coating. Glaco evens the windshield surface, helping to repulse water under air pressure. The invisible wiper improves visibility during bad weather conditions, helping to increase the overall safety of the passengers. In winter or in times of morning frosts, window freezing is impeded. Bottle with a big head makes the application easier, especially on bigger cars! **The invisible windshield wiper effect appears at 45 kph or less,** making the Roll On one of the best options for city driving.

Product No.
04107

Package
120 ml

Guidelines for usage and handling can be found in the last section.

Glaco Q

Glaco Q is the easiest to use product from the Glaco series. It combines cleaning compound with invisible windshield coating, so no preparation of the surface is necessary beforehand for the product to provide exceptional effects. Glaco evens the windshield surface, helping to repulse water under air pressure. The invisible wiper improves visibility during bad weather conditions, helping to increase the overall safety of the passengers. The mouse shape improves the grip and makes the product very easy to apply, even in the corners. **The invisible wiper effect appears at 45 kph!**

Product No.
04168

Package
70 ml

Guidelines for usage and handling can be found in the last section.

Glaco Quick Type

A complementary product and one of the quickest to apply from the Glaco series. Glaco evens the windshield surface, helping to repulse water under air pressure. The invisible wiper improves visibility during bad weather conditions, helping to increase the overall safety of the passengers. In winter or in times of morning frosts, window freezing is impeded. There is no need to wait for the product to dry – you apply it straight on the windshield with the included pad and microfiber cloths.

Product No.
04174

Package
50 ml

Guidelines for usage and handling can be found in the last section.

Glaco Blave

The first ever Glaco product to protect not only glass, but also the outer plastic parts of your car, such as headlight covers, side visors, tail lamp covers, helmet shields and goggles. Specially curved applicator and included microfiber cloth are a major help in application. Water repellent components even the protected surface, helping to repulse water under air pressure. If you are a motorcycle enthusiast, this product sure is suited for your needs!

Product No.
04953

Package
100 ml

Guidelines for usage and handling can be found in the last section.

Glaco „W” Jet

A special, high pressure nozzle that doubles the atomization force is the key of Glaco W Jet popularity. All you need to do is spray the product on the windshield and turn on wiper blades for a moment. The product is easy to use even when used on minivans or other large vehicles. Can also be used during heavy rain! **The invisible windshield wiper effect appears at around 60 kph.**

Product No.
04169

Package
180 ml

Guidelines for usage and handling can be found in the last section.

Glaco Mirror Coat Zero

Ensure the best possible visibility on road with Mirror Coat Zero – why Zero? Because it will repel water from your wing mirrors completely, even when the car is stationary! They spray will allow you to create a perfect, even coat effortlessly, and the included packaging is designed to help you cover other parts of the vehicle when doing so! Just insert the packaging into the slit between the mirror and the body.

Product No.
04172

05060

Package
180 ml

Guidelines for usage and handling can be found in the last section.

ホイール タイヤ

Tires and rims

| Tires | I want my tires to be | With the help of |
|---------------------|------------------------------|-------------------------|
| Digloss Giraedge | Glossy black | A smart applicator |
| Tire Black Wax | Black | A textured applicator |
| Black Black Coating | Matte | 2x sponges and a cloth |
| Pure Shine Coating | Satin | 2x Pitasupo pads |

| Rims | I want my rims to be | With the help of |
|------------------------|-----------------------------|-------------------------|
| Wheel Dust Blocker | Shockingly hydrophobic | 8x cleaning wipes |
| New Brake Dust Cleaner | Clean | A brush |

Digloss Giraedge

A water-based tire coating, taking advantage of the applicator from Glaco Blade! This handy little thing will produce a high shine on your tires, and make the application effortless! Especially useful with low-profile tires and bottom parts, that are usually harder to cover.

Product No.
02087

Package
70 ml

Guidelines for usage and handling can be found in the last section.

Tire Black Wax

A solid, hard wax for tires. Products of this kind are almost impossible to find on the market! Share your love for waxing not only with your paint, but with your tires also! Enhance the natural black colour of the tire and create a wax coating that will protect the surface from harmful effects of sun rays, accumulation of dirt and rain marks. Tire Black Wax is also suitable for black polyurethane bumpers and leather soft tops.

Product No.
02015

Package
170 g

Guidelines for usage and handling can be found in the last section.

Black Black

Black Black is an ideal product if you want to keep your tires in great condition for a long time! It creates a thick coating that maximizes shine, along with superb durability. The non-sticky, hard coating prevents dirt adherence and lasts for more than 60 days, allowing your tires to stay elegantly clean only on regular maintenance. The retail packaging contains two sponges and a cloth that will help you in easy and clean application.

Product No.
02082

Package
110 ml

Guidelines for usage and handling can be found in the last section.

Pure Shine

Pure Shine is a water-based tire coating without petroleum solvents. It protects the tires and gives them a chic and satin look, making your car look more elegant. The emulsion type liquid makes the product very easy to spread on the surface. The retail package includes two special sponges called the Pitasupo, that are specially curved to fit the shape of the tires, resulting in quick, easy and clean application.

Product No.
02079

Package
100 ml

Guidelines for usage and handling can be found in the last section.

Wheel Dust Blocker

This coating agent creates a shockingly hydrophobic layer on the surface of the rims, prevents brake dust adhesion and keeps them in pristine condition for a long time. How does the magic happen? It's all coming from nature! A mix of nano size lotus leaf particles and the latest Japanese technology will keep guard of your shiny rims. The set contains 8 special wipes that will help you to prepare the surface before the application.

クレイクリーナー

Cleaners and clay bars

| Cleaners and clay bars | Feature |
|---------------------------|--------------------------------------|
| Micro Liquid Compound | Minor scratch fixing |
| Stain Cleaner | All-rounder |
| Smooth Egg Clay Bar | More delicate, 2 separate pieces |
| Surface Smoother Clay Bar | More aggressive, one bigger piece |

Micro Liquid Compound

Micro Liquid Compound is a chemical cleaner that will help you prepare your car paint before application of protective coatings. Thanks to its advanced chemical formula, the cleaner will not only remove any stubborn dirt it encounters on its way, but also mask minor scratches on the paint, like the ones around keyholes. It also enhances the gloss, even before the main product is applied! Available in two tone variations to produce best results depending on your car paint colour.

Product No.

09062 & 09063

Package

250 ml

Guidelines for usage and handling can be found in the last section.

Stain Cleaner

A cleaner that chemically breaks down any dirt that a regular shampoo won't handle. It does not include any abrasive compounds, so it's perfectly safe to use on the paint surface, with no risk of damage. All you need to do is spray and wipe off the niggling dirt! The fresh grapefruit scent will make cleaning with this product a real pleasure!

Product No.
00495

Package
500 ml

Guidelines for usage and handling can be found in the last section.

Smooth Egg Clay Bar

A delicate clay bar that will help you prepare your car paint before the application of any protective coatings, no matter whether a sealant, or wax. It removes any dirt that might not be visible with a naked eye, like iron filings, rubber residue, bird and sap droppings. The body of the vehicle will get factory-smooth again!

Product No.

00513

Package

100 g (2 x 50 g)

Guidelines for usage and handling can be found in the last section.

Surface Smoother Clay Bar

A slightly more aggressive clay bar that will help you prepare your car paint before the application of any protective coatings, no matter whether sealant, or wax. It removes any dirt that might not be visible with a naked eye, like iron filings, rubber residue, bird and sap droppings. The body of the vehicle will get factory-smooth again!

00238

Package
100 g

Guidelines for usage and handling can be found in the last section.

プラスチックパーツ

Plastic parts

Nano Hard Plastic

Nano Hard Plastic regenerates pale and discoloured plastic parts of the car, while simultaneously creating a shiny protective coating that is durable for up to 6 months. This product can be used on heated car parts such as the engine or silencer covers (up to 300 °C). Appropriate for different kinds of plastics, best for black and dark grey coloured parts. For transparent elements a separately sold product must be used.

Product No.
03131

Package
8 ml

Guidelines for usage and handling can be found in the last section.

Nano Hard Clear

Nano Hard Clear produces a durable, hydrophobic protective coating that restores transparency, vividness and smoothness of transparent plastic parts of the car, such as front and rear light covers, indicator covers, visors, and others of that kind. The coating is durable for more than 6 months.

Product No.
03144

Package
8 ml

Guidelines for usage and handling can be found in the last section.

Black Parts One

An innovative coating that regenerates and shields unpainted plastic and resin parts, such as bumpers, and other outer plastic elements that your car might have. The retail packaging contains two liquid components - cleaning Liquid Binder, and protective Hard Clear Coat. Combined, they will create a hard and shiny coating of synthetic silicon-based film. Also, there are 4 sheets and 4 sponges added to make the application even easier.

アクセサリー

Accessories

Smooth Egg Sponge

A special sponge designed for car washing. The top layer with its high permeability strongly absorbs any cleaning products used. Dense structure of the highly durable middle layer lets the air through, creating a very rich foam. The bottom layer does not allow any fluid to go through it, resulting in the foam only coming out of top, and more effective use of the cleaning product.

Wait for the sealant to dry on the surface, until white residue becomes visible. 5. Polish the residue with a dry and clean microfiber cloth.

Fusso Coat Mirror Shine

1. Prepare your vehicle by washing it thoroughly with pH neutral shampoo, drying and decontaminating the car paint using a clay bar, a cleaner or other products. 2. Apply the product onto the included microfiber cloth. 3. Polish the liquid firmly on the surface, as there is no drying time needed.

Glasses care

Soft99 offers a wide variety of glasses care products, including the Glaco invisible windshield wipers and glass cleaners.

Ultra Glaco

1. Prepare the glass surfaces by washing them thoroughly with pH neutral shampoo, drying and decontaminating it using a clay bar, cleaner or other products. Glaco products produce best results if the glass is prepared using Glass Compound Z or cleaning compounds from the Glaco series. 2. Make sure that the glass surface is dry before application! The product may cause damage if applied on wet glass. 3. Take the cap off the product and apply it on the glass surface with cross movements. 4. Wait for the product to dry on the surface, until white residue becomes visible. 5. Polish the residue with a dry and clean microfiber cloth.

Glaco Roll On

1. Prepare the glass surfaces by washing them thoroughly with pH neutral shampoo, drying and decontaminating it using a clay bar, cleaner or other products. Glaco products produce best results if the glass is prepared using Glass Compound Z or cleaning compounds from the Glaco series. 2. Make sure that the glass surface is dry before application! The product may cause damage if applied on wet glass. 3. Take the cap off the product and apply it on the glass surface with cross movements. 4. Wait for the product to dry on the surface, until white residue becomes visible. 5. Polish the residue with a dry and clean microfiber cloth.

Glaco Q

1. Prepare the glass surfaces by washing them thoroughly with pH neutral shampoo, drying and decontaminating it using a clay bar, cleaner or other products. Glaco Q does not require windshield preparation beforehand, as it includes the cleaning compound. 2. Make sure that the glass surface is dry before application! The product may cause damage if applied on wet glass. 3. Take the cap off the product and apply it on the glass surface with cross movements. 4. Wait for the product to dry on the surface, until white residue becomes visible. 5. Polish the residue with a dry and clean microfiber cloth.

Glaco Quick Type

1. Prepare the glass surfaces by washing them thoroughly with pH neutral shampoo, drying and decontaminating it using a clay bar, cleaner or other products. Glaco products produce best results if the glass is prepared using Glass Compound Z or cleaning compounds from the

Glaco series. 2. Make sure that the glass surface is dry before application! The product may cause damage if applied on wet glass. 3. Cover the pad with the included microfiber and put a small amount of the liquid on it. 4. Apply the product onto the windshield. There is no drying time needed, the product is effective immediately.

Glaco Blade

1. Prepare the glass surfaces by washing them thoroughly with pH neutral shampoo, drying and decontaminating it using a clay bar, cleaner or other products. Glaco products produce best results if the glass is prepared using Glass Compound Z or cleaning compounds from the Glaco series. 2. Make sure that the glass or plastic surface is dry before application! The product may cause damage if applied on wet glass or plastic. 3. Take off the cap and apply the product directly on the whole surface desired. 4. Immediately wipe off with the included microfiber cloth.

Glaco "W" Jet Strong

In rain: 1. Spray the product onto the windshield for 3 seconds, with the wipers turned on. In normal conditions: 1. Prepare the glass surfaces by washing them thoroughly with pH neutral shampoo, drying and decontaminating it using a clay bar, cleaner or other products. Glaco products produce best results if the glass is prepared using Glass Compound Z or cleaning compounds from the Glaco series. 2. Spray the product onto the windshield, then immediately wipe it off with a slightly wet microfiber.

Glaco Mirror Coat

1. Prepare the mirrors surface by washing them thoroughly with pH neutral shampoo, drying and decontaminating it using a clay bar, cleaner or other products. Glaco products produce best results if the glass is prepared using Glass Compound Z or cleaning compounds from the Glaco series. 2. Spray evenly about 15 cm away from the side mirror. We recommend to separate the sprayed surface in order not to get the fluid on other parts of the vehicle. 3. Dry completely for 1.5 hours and under no circumstance touch the surface.

Glaco De Cleaner

1. Shake the bottle well and turn on the nozzle. 2. Spray about 15 cm away from the cleaned surface. If using inside, spraying onto a cloth is recommended.

Glaco Deicer

1. If there is a lot of snow on the surface, remove it in advance. 2. Spray about 15 cm away from the cleaned surface. 3. Turn on the wipers when the snow and ice starts to melt.

Glaco Glass Compound Roll On

1. Prepare the glass surfaces by washing them thoroughly with pH neutral shampoo and drying. 2. Shake the bottle well and remove the plastic seal. 3. Polish the glass until the surface stops repelling the liquid when the bottle is pressed. 4. Rinse with water after the process is completed.

Glaco Glass Compound Wipes

1. Take out one sheet from the package. 2. Fold the sheet if necessary and wipe the glass until it stops repelling the liquid. 3. If the wipe gets dry, refold and continue to use with the clean side.

Glass Compound Z

1. Prepare the glass surfaces by washing them thoroughly with pH neutral shampoo and drying. 2. Shake the bottle well and apply a small amount of liquid onto the included sponge. 3. Polish the glass using the sponge with cross movements. 4. Rinse with water after the process is completed.

Anti-Fog

1. Shake the can well. 2. If the inner glass is dusted or dirty wipe it off with a microfiber cloth. 3. Spray the product directly onto the glass, or onto a towel or paper, until the bubbles have disappeared, and spread evenly.

Tires and rims _____

Secure your rims and make your car tires shine with a wide range of Soft99 products. Forget about dirty and troublesome process of application!

Tire Black Wax

1. Wash your tires thoroughly to remove dirt. 2. Apply the product onto the included pad by rubbing it lightly into the wax after opening the can. 3. Spread the wax onto the tires thinly and evenly. 4. Wait for the wax to dry on the surface for 5-10 minutes, then polish with a microfiber cloth.

New Brake Dust Cleaner

1. Wash the wheels thoroughly to remove dirt, remove the screw caps, and other elements of this kind. 2. Remove the lock, and spray the product on the cleaned surface. 3. Leave for 2-3 minutes, then use the attached sponge to remove the dirt. 4. Rinse thoroughly with water to remove any remains.

Wheel Dust Blocker

1. Wash the rims thoroughly to remove dirt. 2. Shake the can well and spray on the rims from 10 cm. Do not wipe off! 3. Dry for 20 minutes at 30°C, or for 60 minutes in 10°C. 4. Just after spraying, the surface may become white or liquid streaks may appear, these effects will disappear during the drying time.

Pure Shine Coating

1. Wash your tires thoroughly to remove dirt. 2. Shake the bottle well before use. 3. Apply a small amount of product onto the included sponge. Do not apply onto wet tires. 4. Spread the liquid onto the tires thinly and evenly. 5. Leave to dry for 5-10 minutes.

Digloss Giraedge

1. Shake the bottle well with the cap on before applying. 2. Take off the applicator cap. 3. Cover the whole desired surface with the product. 4. Leave to dry for 5-10 minutes.

Black Black Coating

1. Wash your tires thoroughly to remove dirt. 2. Shake the bottle well before use. 3. Apply the product onto the black side of the included sponge. Do not apply onto wet tires. 4. Spread the liquid onto the tires thinly and evenly. 5. Leave to dry for 5-10 minutes.

Cleaners and clay bars _____

Cleaners and clay bars will let you remove any impurities from your car paint with ease. Using Soft99 cleaners and clay bars makes the adherence of Soft99 protective coatings even better!

Micro Liquid Compound

1. Prepare your vehicle by washing it thoroughly with pH neutral shampoo and drying. 2. Apply a small amount of product onto the black side of the included sponge. 3. Polish the area with force. 4. Wipe off any remains with force.

Stain Cleaner

1. Remove any heavier dirt from the surface in advance. 2. Spray the product onto the cleaned surface. 3. Wipe off with a microfiber cloth.

Smooth Egg Clay Bar

1. Prepare your vehicle by washing it thoroughly with pH neutral shampoo and drying. 2. Knead the clay bar until its soft and flat. 3. Gently slide the clay bar over the surface. 4. Be sure to knead the clay bar

regularly to expose clean clay. Use shampoos, water, quick detailers as a lubricant for the clay bar.

Surface Smoother Clay Bar

1. Prepare your vehicle by washing it thoroughly with pH neutral shampoo and drying. 2. Knead the clay bar until its soft and flat. 3. Gently slide the clay bar over the surface. 4. Be sure to knead the clay bar regularly to expose clean clay. Use shampoos, water, quick detailers as a lubricant for the clay bar.

Plastic parts _____

Clean, regenerate and protect plastic parts of you vehicle with these specialistic Japanese products.

Nano Hard Plastic

1. Remove dirt, oil and any other unwanted residues from the surface. Dry it completely. 2. Wear the included gloves and shake the bottle well. We recommend masking the area around the surface. 3. Apply the product onto the included sponge, then spread it thinly and evenly. 4. Apply a second layer with a new, clean sponge. 5. Do not touch or wet the surface for 24 hours. The coating layer takes 3-4 days to harden completely.

Nano Hard Clear

1. Remove dirt, oil and any other unwanted residues from the surface. Dry it completely. 2. Wear the included gloves and shake the bottle well. We recommend masking the area around the surface. 3. Apply a small amount of product onto the black side of the included sponge and spread it evenly. 4. Dry for 5 minutes, then wipe off with a clean microfiber cloth. 5. Do not touch or wet the surface for 24 hours. The coating layer takes 3-4 days to harden completely.

Black Parts One

1. Remove dirt, oil and any other unwanted residues from the surface. Dry it completely. 2. Apply a small amount of the "Liquid Binder" on the included sheet, then spread it thinly and evenly. 3. Wipe off with the clean side of the sheet. 4. Detach one sponge, apply the "Hard Clear Coat" onto the black side of the included sponge and spread it evenly. 5. Do not touch or wet the surface for 24 hours.

Interior

Make your interior look like as if it was brand-new again with Soft99!

Leather Seat Cleaner

1. Shake the can well. 2. Apply the mousse onto a soft cloth and wipe the seats with force. 3. Wipe off any remaining bubbles and dry.

Leather Fine Cleaner & Conditioner

1. Shake the bottle well. 2. Apply the liquid onto the included cloth and spread it on the leather evenly. 3. Wipe off the surface with a clean microfiber cloth.

New Fabric Cleaner

1. Adjust the nozzle. 2. Spray the product 15-20 cm away from the seats and rub with the included brush. 3. Wipe off the bubbles and any residues with a clean microfiber before the surface dries. 4. Dry the cleaned surface completely.

Cloth Barrier Fabric Coat

1. Clean or wash the fabric element that you want to protect beforehand. Dry it completely. 2. If the temperature inside the vehicle is lower than 10°C heat it up before. 3. Shake the bottle well and turn the trigger. 4. Spray from 20cm away covering the surface evenly. Use the included sponge to even the layer. 5. 12-15 atomization's are advised for one seat. 6. Leave to dry for 2 hours in regular temperatures, or for 4 hours in lower temperatures.

Fabric Seat Spot Remover

1. Soak the sponge in water first. Wring out the sponge moderately, for it to remain moist. 2. Shake the bottle well and apply 5 drops of the liquid onto the sponge. 3. Press and tap the sponge on the stain you want to clean. Repeat this process with the clean side of the sponge. 4. Wring out the sponge and absorb the cleaning remains and water with its wider part.

Accessories

Soft99 accessories offer pure Japanese ingenuity presented in the most user friendly edition possible!

Emblem Remover Kit

1. Check how the emblem is attached. 2. Slip the thread using the included grips between the emblem and the surface. 3. Rub down

slowly to separate the emblem from the surface. 4. Remove the glue residue with the included liquid and the spatula carefully, not to damage the surface. 5. Wipe off the residue with a clean microfiber cloth.

Sticker Remover

1. Cut the nozzle to your desired size. 2. Flip over the edge of the sticker, spray a small amount of the product and remove the sticker with the included spatula. If the sticker is very hardly connected with the surface, let the product work for a moment. 3. Clean the remaining glue residues. If necessary, spray again and rub with the spatula.

Megashaki Scent

1. Push the Megashaki logo. 2. Pull the aluminum sticker down carefully. 3. Push the cap until you heard a clicking sound. 4. Attach the clip on the back side. 5. Attach Megashaki to a wind outlet.
